

# Step forward to → Internship

We'll give you the tools!

We are happy to announce the kick-off of our reimagined internship program, 'step forward to internship'. On top of everything we offered before, **this new program is paid, lasts 3 months and can be done at any of our Lithuanian offices**; yes, you read it right! You can choose to do your internship in Kaunas, Vilnius and even Klaipeda. The best part is that **we are already taking applicants for the Autumn Session**. Exciting, isn't it? Continue reading to see our open internship roles.

## Step forward to → Data Engineer

### Data Engineering Interns

Our **AI/ML/Data Team** is getting ready to welcome 2 interns. During this time, the interns will be able to participate in a real-world project with the help of a mentor who will guide them, answer questions and challenge them!

## Step forward to → Android

### Android Intern

Our Android team is looking forward to guiding, challenging and supporting an intern. During the internship, the team will provide opportunities for the intern to sharpen their Kotlin skills and become part of a fun & professional team!

Step forward to  
→ **Visual Creator** 

## Visual Content Creator Intern

We are seeking a proactive and Visual Content Creator intern that is passionate about videography, photography, brand & web design. During the internship, the intern will join real-time communication campaigns.

## Internship stories

### Benas, **Java** internship

When I arrived, I was surprised to learn that I received a Tech Team Lead as my mentor. Throughout my internship, he answered all of my 'dumb' questions and guided me with his years of experience and deep understanding.

### Martyna, **HR** internship

"I learned a lot about myself during my internship; I discovered what I am good at, what I love doing and what I need to work on."

### Arnoldas, **Node.js** internship

I would say that I gained the skill to "code in a team" thanks to my experience at TeleSoftas.

### Arūnas, **Node.js** internship

"The team provided me with a lot of well-documented learning material and whoever I turned to for advice was excited and willing to help me figure things out."
