WE ARE
HIRING

Junior Software Developer
AI & Machine Learning Solutions

We are an innovative IT start-up specializing in AI and machine learning-based solutions. Our company is built on passionate, creative individuals who work together to achieve common goals. We believe in human potential and invest in the professional development of our employees. If you're an aspiring developer eager to learn and grow in a collaborative environment, you might be the right fit to join us.

LOCATION: Lithuania, with opportunities for international travel
EMPLOYMENT TYPE: Full-time

Requirements

» Good communications skills of the English language.
» Passion for coding and an interest in artificial intelligence and machine learning.
» Motivation to learn and grow in the field of software development.
» Ability to work in a team-oriented environment focused on achieving common goals.

What we offer

» Comprehensive training, both in the classroom and "on the job" or real projects going on, to develop high-level skills in coding, AI and machine learning.
» Opportunities to work in an international environment and engaging projects that go beyond borders.
» People-centric company culture with room for creativity, innovation, and interaction.
» Possibility of remote work and flexibility in managing your time.
» Bonuses and incentives based on company success and contributions to team goals.
